

## Ch. 3 Rock Review

*Be able to identify properties of rocks*

**A**

**B**

**C**

**D**

**1. Which rocks have a fine-grained texture?**

**A**

**B**

**C**

**D**

**2. Which rocks cooled on the surface?**

**A**

© geology.

**B**

**C**

**D**

**3. Which rock cooled the fastest?**

**4. Which of the following best describes the texture of the rock labeled A?**

- (A) rough
- (B) glassy
- (C) metallic
- (D) coarse-grained

**A**

**B**

**C**

**D**

**5. Which rocks formed deep beneath the surface?**

**C**

**D**

**6. Which rock cooled slower?**

## 7. How did these rocks form?

- a) By cooling
- b) By compaction and cementation
- c) By heat and pressure
- d) By melting

**8) Is this rock a foliated or nonfoliated metamorphic rock?**

**9) Which major types of rock can have layers?**

- a) Igneous
- b) Sedimentary
- c) Metamorphic

**A**

**B**

**C**

**D**

**10. Which rocks are extrusive igneous rocks?**
